THE FOYER AT TAPLEY MEMORIAL HALL

In 1928 Lester Couch, a noted Danvers architect was commissioned by the Danvers Historical Society to build Tapley Memorial Hall. He chose the beautiful Neo-classical Georgian style of architecture. Landry Home Decorating has been inspired by the fine craftsmanship of the architect's work and, as a result, has created a warm and welcoming foyer for all who enter this historic building.

We hope you will take a moment to reflect on the rich details in this space. Please take note of the wood carvings trailing up the stairs and the colorful jewel tone runner, the freshly upholstered azure blue settee, with its delicate floral crest. And do not miss the gorgeous Schonbek ceiling fixture illuminating this thoughtful design. We are so happy you came to visit us!
